ABSTRACTED-PUB-NO: EP 330532A BASIC-ABSTRACT:

Capsules contg. in solid, co-micronised form, fenofibrate (I) and a solid surface active agent (II), are new.

The wt. ratio of (II)/(I) is generally 0.75-10.5/100. The unit dose of (I) is 200 mg, and the pref. surfactant (II) is sodium lauryl sulphate. The particle size of (I) and (II) is generally less than 15 microns preferably below or equal to 5 microns. Other components that may be present include dispersing agents, fillers and flow agents.

USE/ADVANTAGE - (I) is a known anti-hyperlipidemic and anti-cholesterolemic agent. The novel formulations enable treatment to be given as a single oral daily dose. ABSTRACTED-PUB-NO:

EP 330532B EQUIVALENT-ABSTRACTS:

A therapeutic composition, which is useful especially in the oral treatment of hyperlipidaemia and hypercholesterolaemia, said composition containing <u>fenofibrate</u> and a solid surfactant which have been co-micronised.

US 4895726A

<u>Therapeutic</u> compsn. comprises gelatin capsules contg. a co-micronised mixt. of (i) particles of <u>fenofibrate</u> and (ii) a solid surfactant, and particle size less than 15 microns.

Pref. wt. ratio (ii):(i) is 0.75-10.5/100. Amt. of (i) comprises 200 mg per therapeutic unit. Cpd. (b) is 0.5-7 wt.% of sodium lauryl-sulphate w.r.t. total. Opt. dispersants, fillers and flow enhancers are included in the compsn.

USE - For orally treating hyperlipidaemia and hypercholesterolaemia, having improved bioavailability. (5pp)u
